GENETICS:
Genetics come from the supreme Orange Bud mother plant, converted into an auto form with genetics from Auto Daiquiri Lime.

TOTAL LIFE CYCLE IN WEEKS:
10-11 weeks.

PLANT SIZE:
Typically around 70-90 cm, taller in optimum conditions. A dominant central bloom is surrounded by a ring of side blooms.

YIELD INDOOR:
300 g+ in hydro with a 20/4 light schedule.

YIELD OUTDOOR:
50-100 g+ depending on conditions, sunlight and temperature.

TASTE/AROMA:
Strong citrus orange taste with a sweet tangerine aroma.

EFFECT:
The high arrives quickly, cerebral stimulation with a feel good ‘up’ high. Very relaxing and suited to creative pursuits.
GENETICS:
Soul Star (Sensi Star 2004 x Peyote Purple black pheno) x Tahoe (original OG cut).

FLOWERING TIME:
8 weeks.

HARVEST MONTH:
Late September to early October depending on the latitude.

PLANT SIZE:
Medium.

YIELD INDOOR:
Medium to high, depending on the growing style, with superior results in hydro and aero.

YIELD OUTDOOR:
High and mostly depends on the quantity of the earth you use and the training system - usually it is a medium-high yielding plant but, with an earth substrate, it could grow to very high levels.

TASTE/AROMA:
Two phenotypes are available, one combines real OG tones with the lemon fruit of the classical Sensi Star, the other is totally OG, earthy, mossy and hash-like.

EFFECT:
Very strong, joyful, happy, relaxing, but if you exceed, it can also cause a little fright, especially in people who tend to be anxious, due to the effect of the Black Jesus genetics – we therefore recommend smoking it slowly and let the effect take place little by little.
GENETICS:
(Grandaddy Purple x OG Kush) crossed with a pre ’98 Bubba Kush reverted male.

FLOWERING TIME:
7.5 weeks.

HARVEST MONTH:
October.

PLANT SIZE:
0.7-1 m. Indica genetics with a compact, bushy format.

YIELD INDOOR:
Yields above average, 250 g+ from a hydro grow.

YIELD OUTDOOR:
200 g++.

TASTE/AROMA:
An earthy kush aroma, with dominant sour and fruity tones. Unusual sweet oily aroma with a hint of Blueberry.

EFFECT:
A genuine premium potency variety, bred for strength rather than yields. Fast hitting strong Kush, warming, soothing and intense. Highly recommended!

www.dutch-passion.com
GENETICS:
Polyhybrid cross.

FLOWERING TIME:
Around 10 weeks.

PLANT SIZE:
100-150 cm.

YIELD INDOOR:
550-600 g/m².

YIELD OUTDOOR:
100-250 g.

TASTE/AROMA:
A combination of sweet notes with a penetrating citric taste tending towards lemon.

EFFECT:
Euphoric and psychedelic cerebral effect.

www.buddhaseedbank.com

CALAMITY JANE
GENETICS:
White x Blue x Afghani (90% Indica / 10% Sativa).

FLOWERING TIME:
60-65 days / 8-9 weeks.

HARVEST MONTH:
Late September.

PLANT SIZE:
70-90 cm indoors - up to 2 m outdoors.

YIELD INDOOR:
500-550 g/m².

YIELD OUTDOOR:
Up to 900 g/plant.

TASTE/AROMA:
A very sweet and fruity, mainly orange, taste, with notes of caramel and an amazing earthy background, an intense aroma.

EFFECT:
A potent, sedative and relaxing effect, suited to alleviate pain and make you sleep well.
GENETICS:
Dutch Charlotte (CBD rich clone) x Red Angel (clone-only Amsterdam CBD variety).

FLOWERING TIME:
11 weeks.

HARVEST MONTH:
November.

PLANT SIZE:
The sativa genetics can produce tall plants, 1-1.2 m tall.

YIELD INDOOR:
Above average yields. In hydro systems 250 g++.

YIELD OUTDOOR:
250 g+ when grown in climates with a long growing season.

TASTE/AROMA:
Pine/Diesel aroma with fruity undertones.

EFFECT:
No high from this variety (<1% THC, 15% CBD), but a very smooth, relaxing CBD rich experience.

www.dutch-passion.com
**GENETICS:**
CBD rich clone x Northern Lights Auto.

**TOTAL LIFE CYCLE IN WEEKS:**
10 weeks.

**PLANT SIZE:**
80-120 cm.

**YIELD INDOOR:**
325g m².

**YIELD OUTDOOR:**
120 g.

**TASTE/AROMA:**
Earthy, Pine.

**EFFECT:**
Slightly noticeable high since the strain only contains 0,8% THC and 7-15% CBD.

[www.zamnesia.com](http://www.zamnesia.com)
GENETICS:
Dinamed CBD x Critical + Auto.

FLOWERING TIME:
10 weeks after germination.

PLANT SIZE:
Up to 1 m.

YIELD INDOOR:
Up to 100 g/m².

YIELD OUTDOOR:
Up to 100 g/plant.

TASTE/AROMA:
Fruity, more sweet than citric.

EFFECT:
Relaxing and anxiolytic, does not alter your senses.
GENETICS:
80% Indica - 20% Sativa.

FLOWERING TIME:
60 days.

HARVEST MONTH:
Mid October.

PLANT SIZE:
250 cm.

YIELD INDOOR:
500 g/m².

YIELD OUTDOOR:
1000 g/plant.

TASTE/AROMA:
Earthy caramel, sweet skunk.

EFFECT:
Strong body stoned.

www.paradise-seeds.com
GENETICS:
100% Indica / Appalachian Kush x Sugar Black Rose / THC 24.8%.

FLOWERING TIME:
55 days.

HARVEST MONTH:
Late September

YIELD INDOOR:
600 g/m² indoors.

YIELD OUTDOOR:
More than 2000g/plant outdoors.

TASTE/AROMA:
Earthy with mango and passion fruit notes. Earthy smell with metallic notes.

EFFECT:
Relaxing and narcotic.

www.deliciousseeds.com
**GENETICS:**
Gorilla Glue x Girl Scout Cookies (Thin Mint phenotype).

**FLOWERING TIME:**
9 weeks.

**HARVEST MONTH:**
Late September.

**YIELD INDOOR:**
400-550 g/m².

**YIELD OUTDOOR:**
350-600 g/plant.

**TASTE/AROMA:**
Intense aromas and tastes with notes of cypress and earthy-citric undertones.

**EFFECT:**
Very potent, cerebral, euphoric, relaxing and strong.

www.sweetseeds.com
GENETICS:
Diesel x Diesel (40% Indica/ 60% Sativa).

FLOWERING TIME:
65-70 days / 9-10 weeks.

HARVEST MONTH:
Mid-October.

PLANT SIZE:
1 to 1.50 m indoors - up to 3 m outdoors.

YIELD INDOOR:
450-550 g/m².

YIELD OUTDOOR:
Up to 1 kg per plant.

TASTE/AROMA:
Intense citric taste with marked fuel tones - characteristic petroleum aroma.

EFFECT:
Stimulant and psychoactive without being too heavy, suited to alleviate stress and anxiety.

www.geaseeds.com
GENETICS:
Larry OG x Kosher Kush.

FLOWERING TIME:
9 weeks.

HARVEST MONTH:
First week of October.

PLANT SIZE:
180 cm.

YIELD INDOOR:
450 g/m².

YIELD OUTDOOR:
400-500 g/plant.

TASTE/AROMA:
Lemon, pine & honey.

EFFECT:
Very potent.

HERZ OG

www.exoticseed.eu
GENETICS:
25% Indica - 75% Sativa.

FLOWERING TIME:
60 days.

HARVEST MONTH:
Mid October.

PLANT SIZE:
250 cm.

YIELD INDOOR:
500 g/m².

YIELD OUTDOOR:
750 g/plant.

TASTE/AROMA:
Grapefruit.

EFFECT:
Soft cerebral, pleasant.

www.paradise-seeds.com
GENETICS:
Hybrid from highly potent indica strains.

FLOWERING TIME:
58-63 days.

HARVEST MONTH:
Late September.

PLANT SIZE:
May exceed 200 cm outdoors.

YIELD INDOOR:
500 g/m² and more.

YIELD OUTDOOR:
500 g / 1.5kg.

TASTE/AROMA:
Fresh and minty, a fresh and dense smoke.

EFFECT:
A long-lasting high.

www.buddhaseedbank.com
GENETICS: Afghani crossed with Skunk.

FLOWERING TIME: 45-55 days.

TOTAL LIFE CYCLE IN WEEKS: 8 weeks. Very easy to grow with very good results and minimum care.

PLANT SIZE: Medium-sized, with rapid growth and early ripening.

YIELD INDOOR: 550-600 g/m².

YIELD OUTDOOR: 1500-2000 g.

TASTE/AROMA: Intense, fruity and sweet.

EFFECT: A potent Indica effect.

www.genehtik.com
AUTO BLACKBERRY KUSH

Dutch Passion
GENETICS:
A hit since the day it was launched; this souped up Kush delivers everything you’d expect from a plant with such illustrious pedigree. A resilient, high yielding strain full of flavour. Just a few reasons why so many people keep coming back for more.

FLOWERING TIME:
50 days.

HARVEST MONTH:
Early October.

PLANT SIZE:
Up to 250 cm.

YIELD INDOOR:
Up to 550 g/m².

YIELD OUTDOOR:
Up to 1000 g.

TASTE/AROMA:
Sweet and zesty with after tones of sandalwood.

EFFECT:
Strong and potent Indica.
GENETICS:
Las Vegas Lemon Skunk x Zkittlez. From the hybridisation the Lemon Zkittle offspring was selected.

FLOWERING TIME:
9 weeks.

HARVEST MONTH:
October.

PLANT SIZE:
Around 1-1.25 m.

YIELD INDOOR:
Heavy XL yilder, 400 g++ in hydro.

YIELD OUTDOOR:
300 g+.

TASTE/AROMA:
A sharp, sweet lemon citrus taste with a pleasing skunky aroma of freshly sliced lemon/lime.

EFFECT:
Very strong long lasting high. Anti-anxiety effect and a strong cerebral impact. For experienced smokers only!
GENETICS:
100% sativa from Malawi.

FLOWERING TIME:
10-13 weeks.

HARVEST MONTH:
End of October / beginning of November.

PLANT SIZE:
1-3 meters.

YIELD INDOOR:
500-700 g/m².

YIELD OUTDOOR:
1-3 kg.

TASTE/AROMA:
Concentrated aroma of oil, sweet carrot, ripe tangerine and wood.

EFFECT:
Extraordinarily potent, intense and psychedelic, lasting longer than 4 hours. Only for the most experienced and expert users.

www.aceseeds.org
GENETICS:
Bubba’s Gift x OG/Afghan X.

FLOWERING TIME:
48-53 days.

HARVEST MONTH:
Late September.

PLANT SIZE:
2-3 m.

YIELD INDOOR:
400-600 g/m².

YIELD OUTDOOR:
1-2 kg/plant.

TASTE/AROMA:
Exotic fruit notes, mainly coconut and mango with slight savoury touches of acid fruit.

EFFECT:
Soothing combined with great potency.
GENETICS:
Kritical x Big Bud.

FLOWERING TIME:
55-65 days indoors.

HARVEST MONTH:
Outdoors, beginning of October.

TOTAL LIFE CYCLE IN WEEKS:
70-75 days.

PLANT SIZE:
Up to 2.5 meters outdoors.

YIELD INDOOR:
From 550-600 g/m².

YIELD OUTDOOR:
In excess of 900 g.

TASTE/AROMA:
Tangerine.

EFFECT:
Very narcotic and relaxing.

One of the most awarded varieties.

www.mrhideseeds.com
GENETICS:
GMK x Cookie S1.

HARVEST MONTH:
Beginning of October.

PLANT SIZE:
From 1.5 to 1.8 meters.

YIELD INDOOR:
400-450 g/m².

YIELD OUTDOOR:
500-750 g/plant.

TASTE/AROMA:
Intense and potent fragrance with hints of bitter, like freshly roasted coffee.

EFFECT:
Very pleasant and lasting physical and mental sensation; a truly mystic pleasure.

www.positronics.eu
GENETICS:
50% Sativa.

FLOWERING TIME:
60 days.

HARVEST MONTH:
September.

PLANT SIZE:
Up to 1.5 m indoors.

YIELD INDOOR:
More than 500 g/600 W.

YIELD OUTDOOR:
0.5-1 kg/plant

TASTE/AROMA:
Fruity.

EFFECT:
Cerebral.

www.pyramidseeds.com
GENETICS: G.T Rosenthal+ L.A+.

FLOWERING TIME: 60-65 days.

HARVEST MONTH: First two weeks of October.

PLANT SIZE: From 150 to 200 cm.

YIELD INDOOR: 500-600 g/m².

YIELD OUTDOOR: 650-850 g/plant.

TASTE/AROMA: Sweet-citrus.

EFFECT: With an aroma that is intense and sweet at the same time, it provides a long lasting high that dissipates into a pleasant and healthy mellow feeling.
GENETICS:
Jack Herer female x PAK male.

FLOWERING TIME:
60-70 days.

HARVEST MONTH:
Mid to late October.

PLANT SIZE:
3.5 m.

YIELD INDOOR:
650 g/m².

YIELD OUTDOOR:
1500 g/plant.

TASTE/AROMA:
Sweet fruity notes combined with a typical Moby Dick pine taste.

EFFECT:
Potent, cerebral, euphoric and long-lasting.
GENETICS:
Blueberry female x PAK male.

FLOWERING TIME:
60 days.

HARVEST MONTH:
Late September to early October.

PLANT SIZE:
Up to 2.50 m.

YIELD INDOOR:
500 g/m².

YIELD OUTDOOR:
600-800 g/plant.

TASTE/AROMA:
Very fruity with pineapple hints.

EFFECT:
Decisively relaxing.

www.dinafem.org
GENETICS:
40% indica 60% sativa.

HARVEST MONTH:
Indoors, flowering lasts 9 weeks; outdoors, it can be harvested in early October.

PLANT SIZE:
Outdoors, it grows very tall; indoors, you need to move it soon to the flowering room, as it grows to quite a tall height.

YIELD INDOOR:
Up to 1g/watt of light.

YIELD OUTDOOR:
Several kilos depending on height.

TASTE/AROMA:
Exotic and spicy, cloves and ginger.

EFFECT:
Clear-headed, harmonious and well-balanced.

www.eliteseeds.com
GENETICS:
Pepita Malaya+ L.A+.

FLOWERING TIME:
40-45 days.

HARVEST MONTH:
First two weeks of September.

PLANT SIZE:
From 160 to 200 cm.

YIELD INDOOR:
450-550 g/m².

YIELD OUTDOOR:
500-850 g/plant.

TASTE/AROMA:
Incense-musk.

EFFECT:
Very potent and intense. It can be felt from the first few hits. A plant that was selected and improved by our breeder to make the aroma more potent and the effects longer lasting.

Third prize at the 2017 Castellòn Cannabis Cup (Spain), indoors.

www.thegreentopia.com
GENETICS:
Sour Dubb x Chem Sis x Chocolate Diesel.

FLOWERING TIME:
8–9 weeks.

HARVEST MONTH:
October.

PLANT SIZE:
90–170 cm.

YIELD INDOOR:
500-550 g/m².

YIELD OUTDOOR:
550-600 g/plant.

TASTE/AROMA:
Earthy and sweet notes perfectly complemented by a touch of pine and lemon.

EFFECT:
Cerebral and relaxing (with 50% Sativa and 50% Indica genetics), THC at 27%, total relaxation combined with great euphoria.

www.royalqueenseeds.com
GENETICS:
A Sativa-dominant strain.

FLOWERING TIME:
65-70 days.

HARVEST MONTH:
November.

TOTAL LIFE CYCLE IN WEEKS:
14 weeks.

PLANT SIZE:
50-120 cm.

YIELD INDOOR:
400-550 g/m².

YIELD OUTDOOR:
300-2000 g.

TASTE/AROMA:
A dominant incense aroma with fruity notes.

EFFECT:
A feel-good adrenalin rush.

www.genofarm.com
GENETICS:
Self-pollination (S2) of a CBD-rich clone with ancestors from the Diesel family.

FLOWERING TIME:
9 weeks.

HARVEST MONTH:
Late September.

YIELD INDOOR:
400-500 g/m².

YIELD OUTDOOR:
375-600 g/plant.

TASTE/AROMA:
Sweet and fruity aromas and tastes with citric notes of tangerine and a slight fresh undertone of cypress.

EFFECT:
Imperceptible psychotropic effects, relaxing and light.

Remo Chemo is certainly one of our most special strains. She comes from our first collaboration with the legendary Canadian cannabis grower Remo, also known as Urban Remo. Besides, her extremely high THC levels (24 %) not only make her a must for cannabis gourmets with a liking for mind-blowing genetics but they also confer a myriad of therapeutic properties on her.
