It was the 1980s when I began collecting seeds and experimenting with breeding. It was my goal to produce the best quality cannabis, but I never imagined that this would become a lifetime passion.

This is a big year for us. A whole quarter century of Paradise! It’s been a blast - 80 cannabis cups, 36 strains, an Amsterdam store, Paradise plants grown around the world, involvement with some of the most amazing events and projects and, at last, big moves on legalization!

We have much to celebrate this 25th anniversary…. but none of this would have been possible without YOU! I’m talking about the growers, the fans, our customers and our partners who have supported us over the years. So big thanks and big love to you all!
